

TMS 6.003 Fix for MS Office 2003:

I. Problem:

If you have MS Office 2003 installed on your computer, you will have to use the “**Runtime Version of Access**” to open and operate TMS. The Runtime Version of Access is automatically installed when you install TMS 6.003.

II. Cause:

The problem exists with MS Access as found in Office 2003. There is an unavoidable conflict with TMS 6.003.

III. Solution:

To open TMS with the **Runtime Version**, follow the steps outlined below:

- Click the "**Start**" button in the start bar at the bottom left of the screen.
- Select "**All Programs**"
- Select "**TMS**"
- Select "**TMS 6**"
- TMS should open
